Objective

Seeking full-time employment as a software engineer after graduation in Decemeber 2014. Interested in a position in Web or Mobile Development.

Skills

Git, Ruby, Rails, Sinatra, Java/Android, Obj-C/iOS, Html5/CSS3, JS/JQuery, RESTful HTTP, JSON CRUD, Unix Terminal, SQL

Experience

Major League Hacking — NEW YORK, NY
Coach and Campus Representative — *Fall '14 – present*
A campus representative and a community leader to help inspire and encourage fellow students to develop their own applications and participate in hackathons.

Unhackathon — STONY BROOK, NY
Lead Web Developer, Organizer and Workshop Instructor — *Summer '14 – Fall '14*
Built an interactive signup form and complimentary backend to host the 400 student signups. In addition I wrote and hosted an introductory workshop into web development.

Stony Brook Children's Hospital — STONY BROOK, NY
Lead Mobile Developer — *Spring '14 – Summer '14*
A interactive mobile application to step paitents through the 24 hour long time sensitive procedure to prepare themselves for a colonoscopy.

Stony Brook Mobile App Developers — STONY BROOK, NY
Founder & President — *Spring '13 – Fall '14*
During our weekly meetings, members would showcase their applications and tutorials on mobile development in hopes to educate and encourage fellow students to develop for mobile devices.

Sport195 — NEW YORK, NY
Technical Intern — *June '13 – Aug '13*
Introduced to Ruby on Rails and Git. Participated in business conferences and helped pitch ideas. Developed a new Image Cropping tool using RMagick to work with our current gem dependencies

Personal Projects

Mobile Cloud Based Application
Swag Exchange — *Fall 2014*
This Fall for CSE391 - Mobile Applications I am developing a new exchanging platform similar to Craigslist and Ebay for convention swag. Using a Sinatra back-end, I will help users find, sell and trade tee-shirts and other commercial goods while at Hackathons and other Conventions. Their iOS and Android devices can take pictures of the items and put them up for sale/trade and my server back-ends will handle the necessary communications for users to find each other in person and make the exchange.

Education

Stony Brook University — STONY BROOK, NY
Bachelor of Science in Computer Science — *impending 2014*
Clubs: SBU Computing Society, SBU Mobile App Developers, Game Developers, Linux Users' Group SBU
Leadership: Mobile App Developers Founder and President, Unhackathon Organizer 2014 , Geek Games Organizer [Fall 2013, Spr 2014, Fall 2014], Guest Speaker for Linux Users' Group [Fall 2013, Fall 2014]
